

## Waterproofing Experts Informative Newsletter January 2021

### How Can You Protect Your Home From Water Damage Before the Rainy Season?

#### Clean Your Gutters Frequently

Although you might only consider gutter cleaning necessary once or twice a year, your home can really benefit from a monthly gutter cleaning.

#### Push Rain Runoff Away From the Foundation

Keep rainwater flowing away from your home with downspout extensions. Doing so can help water from infiltrating through foundation cracks and getting into your basement.

#### Maintain Your Sump Pump

A key way to prevent expensive water damage is to be sure that your sump pump is operating correctly. Mark your calendar and inspect your sump pump.

#### Inspect Your Home For Water Leaks

By checking in frequently with your home's plumbing lines, you'll be better able to locate water leak issues as they surface.

#### Take A Close Look At Your Roof

One way that big water damage issues occur to homes is through the roof. By monitoring and

#### Insulate Windows and Balcony Doors

Insulating windows and balcony doors can not only help prevent cold from getting in, but it

Many times, the key to preventing water damage is to catch it early where a nominal repair can save from a major expense.

replacing loose shingles, you'll help to prevent water damage to your roof that can sometimes go unnoticed.

also avoids any leaks that can penetrate through the walls in a rainy season. One solution is to seal drafts with weather-stripping providing an energy save solution with an average of 10 percent on year round energy cost.
